

Eye Shields**YC-HM188**

1. Eye shields are designed to provide protection of the ocular structure;
2. Two pieces in per set;
3. Coated the polymer material on the surface to reduce scattering;
4. Shape size: the external diameter is 28mm and the internal diameter is 23mm.

Water Bath**YC-HM175**

1. Stainless-steel material;
2. Shape size: 650×600×200mm.

Testicle Shields**YC-HM187**

1. Shielding material;
2. Testicle shields are designed to reduce scatter radiation to the testicles;
3. All surfaces are coated with a polyurethane paint to reduce lead exposure;
4. Each unit is cast to provide a lead wall and features an open sector to allow comfortable attachment to the patient;
5. There are one testicle shield and one testicle shield stand in per set;
6. Shape size: the external diameter is 86mm, the internal diameter is 60mm and the maximum regulation range of the testicle shield stand is 250mm.

Scanning Water Phantom**YC-HM184**

1. Compatible with the 0.6CC ionization chamber;
2. It has scale instruction, water tap and screws for horizontal adjustment;
3. It can be customized.

Horizontal Radiotherapy Bed**YC-HM177**

1. Used for electronic-ray treatment;
2. Steel material bed and aluminium alloy material light box;
3. Reflection and scattering screen at both front and back, and the thickness of the screens is 10mm;
4. The height range of the treatment bed is 176-216mm.

Radiotherapy Bower**YC-HM176**

1. Used for x-ray treatment;
2. Reflection and scattering screen at both front and back;
3. Two hand grips at both sides;
4. Casters at the bottom are easy to mobile.
